ADRESS : Ayaspaşa Mahallesi 5. Sokak No:4-C SARAY / TEKİRDAĞ - TURKEY

PHONE NUMBER : +90 282 768 21 19

Postal Code: 59600

Product Definition Purpose and Usage Area:

NOKTA CNC Brand NX170-Pro Model produced with this machine, a CNC engraving and cutting used to transfer (dimensioning, cutting and 3D machining) shapes on marble, iron and steel within a very precise dimensions, solid state model or 2 dimensional drawing. the machine.

CNC Machine Technical Specification:

MODEL NUMBER: NX170-Pro Series

Net Workspace Area: 3550x1800x1800mm.

TOTAL POWER: 12.5KW - 220-380V/AC Frequency: 50/60Hz.

Serial Number: 00126549-3D192

Type: 3D Pro+ Series

Production Date: 2021-06-25

Risks Arising From Misuse:

The dust collecting unit must be operated while working with the machine due to the cutting and piercing tools on the product. Despite this, inhalation of dust particles that will blow into the air during cutting is harmful for health and it is absolutely necessary to use a mouth mask as an auxiliary equipment. Gloves must be used on hands to remove residues from cut parts and remove them from the machine. The use of gloves is essential in case the remaining chips and the small pieces coming out are handled and cut. During cutting, the point that can see the milling bit should not be stopped. Since there may be pieces that will come out of the cut material and throw off, it should be outside the visible area of the cutting tool during the operation of the machine.
